## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US2005/000024

	Box N	o. I Basis of the opinion		
1.		With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.		
	<sub>,</sub> la	nis opinion has been established on the basis of a translation from the original language into the following nguage , which is the language of a translation furnished for the purposes of international search nder Rules 12.3 and 23.1(b)).		
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:			
a. type of material:				
		a sequence listing		
		table(s) related to the sequence listing		
	b. format of material:			
		in written format		
		in computer readable form		
c. time of filing/furnishing:		of filing/furnishing:		
		contained in the international application as filed.		
		filed together with the international application in computer readable form.		
		furnished subsequently to this Authority for the purposes of search.		
3.	ha co	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto as been filed or furnished, the required statements that the information in the subsequent or additional opies is identical to that in the application as filed or does not go beyond the application as filed, as opropriate, were furnished.

- 2. Document D5, which was published after the priority date of the current application is not taken into account for the present opinion.

#### 3. Novelty

The compounds of the present application are anticipated by D1, which exemplifies several compounds which fall under the definition of formula (I) as claimed in claim 1. D2 describes in Example 18 a compound which falls under formula (I) of the present application. Novelty is not acknowledged re D1 and D2.

#### 4. Inventive step

The problem underlying the current application resides in the provision of benzimidazole or benzotriazole characterized by a 5-heterocyclic ring attached to the benzo ring of the benzimidazole moiety as kinase inhibitors.

Kinase inhibitors are disclosed in D2 to D4. The general formula of D2 comprises the compounds of formula (I) of the present application and specifically an example (see example 18) is given which falls within the subject-matter of the present application.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/US2005/000024

Moreover, D3 discloses benzimidazole derivatives substituted by 5-heterocyclic rings, which only differ from the compounds of the present application in the presence of an oxo group in position 2 of the benzimidazole. In addition D4 generically discloses that imidazole attached to a benzimidazole are suitable as kinase inhibitors. The prior art is therefore considered to contain all information to arrive at the compounds of the present application with the expectation that they would possess kinase inhibitory activity. In the absence of experimental data which show unexpected effects for the compounds of the present application compared to the structurally closest compounds of the prior art, inventive step cannot be acknowledged.
